Resolve® System

Imagine a place
for you to connect, create,
produce, inspire, grow.

Align your vision
with function, refined design.
Invite character.

Make a space your own
for comfort, infused with light.
Welcome ideas.

Balance enrichment
with value, efficiency.
Naturally. Simply.

The Resolve System

“Resolve is welcoming. It’s based on a geometry that nature uses. The 120-degree angle is the favorite angle in nature. It’s how honeycombs are made and how trees branch out. The reason for that is it’s the most economical solution.”

– Ayse Birsal

What's natural for people comes naturally to Resolve. Like Openness. Connection. Imagination. Performance. Simplicity. Balance.

Resolve is a human-centered system that invites people to feel valued and connected. It's a place to perform and display work—individually or in teams. A place that links people with technology. Nurtures innovation. Balances employee enrichment with economics. And blends functionality with refined design.

Resolve supports a wide variety of environments, from traditional workspaces to innovative applications. Its versatile character lets organizations create environments to suit their vision. It's where people express their personality, innovate, and communicate.

Resolve helps people do what comes naturally.

Imagine. Connect. Create. Grow.

Bookshelf

Attached to the back of the Boomerang™ work surface, the bookshelf holds books and other items just above the work surface. Another possibility for referencing and accessing work materials within reach is the display stand.

Storage

The storage cabinet and ladder shelf provide plenty of space for keeping materials at hand. Traditional R-pull lateral files and pedestals integrate well with Resolve’s storage components. An additional storage option includes the tool rail for paper organization.

Canopy

Resolve’s canopies provide a sense of enclosure and serve as wayfinding signals. Rolling screens are also available for creating boundaries and enclosure.

Pole Shelf

Displaying personal items and storing small electronics within reach is easy on the pole shelf, which attaches to a tall or short pole.

Work Surface

Resolve’s work surfaces are formed and shaped for the human scale and designed to support a wide range of workers and work styles. They accommodate equipment as well as create places where people can work, gather, share, and connect.

Qt Quiet Technology™

For sound masking, the Qt Quiet technology unit mounts on top of a tall pole to mask distracting background noises within the work environment.

Acoustical Insert

Sound blocking and sound absorbing, the acoustical insert fits between two boundary or display screens to increase acoustical privacy.

Display Components

The Bubbletack™ surface of the display screen provides a vertical surface for attaching work tools, organizing materials, and displaying personal items—either by tacking with pins or the Velcro tools.

Signage

For branding, workstation identification, or personalization, a 6-inch-diameter disk displays messages on one side and attaches to tall, short, or in-line poles.

Power and Data

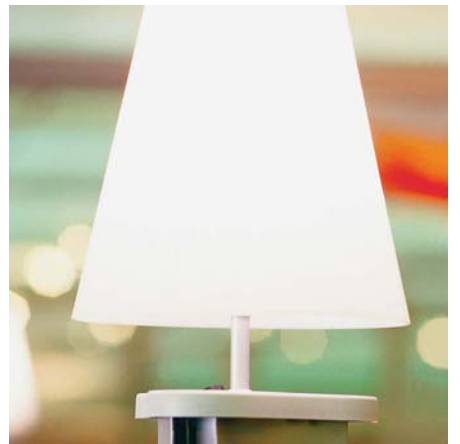

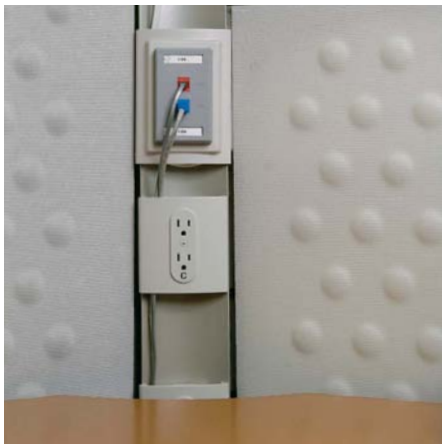

Resolve distributes power and data cables from the floor, wall, or ceiling, and routes them up poles, along trusses or lower support arms, and to receptacles.

Pole

Attached to trusses and arms, the pole—either two- or three-sided, and short or tall—is elemental to the infrastructure and provides an avenue for power and data distribution.

Pole Lamp

When indirect lighting is desired, pole lamps mount on top of a short pole. Other lighting options include task, accent, and truss lights.

Resolve offers a harmonious palette of colors designed to be used together. The palette features a range of warm and cool colors grouped by value: light, medium, and dark. With such a selection, it's easy to use color for wayfinding, boundary definition, and organizational branding. Resolve creates a unified appearance in any environment—from traditional to innovative.

Infrastructure

To coordinate with an environment's architectural elements, a range of colors are available for infrastructure finish and trim. These colors help convey cohesive aesthetics throughout the workspace.

Screens

Screens divide space, establish wayfinding, complement the infrastructure, and communicate brand. Offered in an array of colors to coordinate with traditional and innovative environments, they attach to upper and lower support arms.

Display screens in Bubbletack fabric allow for accessible vertical storage of work materials and display of personal items. Boundary screens in Multiscrim™ and Horizon fabric are available in a breadth of colors.

Resolve helps organizations communicate brand through screen-customization opportunities with graphics, colors, and fabrics. Graphics printed on screens can provide brand, company, or team identity, wayfinding, or even advertising space.

Surfaces

Surfaces complement the character of a workspace. Resolve offers laminate, wood veneer, cathedral recut veneer, or Formcoat® finish for surfaces to help align design strategy with corporate image.

Veneer surfaces convey a rich, refined appearance that coordinates with an organization's brand, culture, or hierarchy.

Formcoat surfaces provide a smooth, seamless, and durable finish in a versatile range of colors, available in opaque, translucent, or fleck finish to coordinate with Resolve veneers. Custom colors are also available to smoothly integrate with any environment.

Flexible and balanced

Support heads-down work and individual comfort.
Create team space with seated-height infrastructure to facilitate impromptu interaction.
Divide space using traditional lateral files with a shared top surface.
Harmonize light and sophisticated finishes for a warm environment.

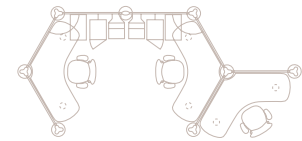

Boundary screens in Dune Beige and display screens in Caramel Beige, enhanced by Soft White trim. Work surfaces, shelves, and shared tops with Formcoat Fleck finish in Maple. Quadrant™ lateral files in Soft White. Eames® meeting table with Formcoat Fleck finish in Maple and Soft White column and base. Aeron® chair frames in Titanium with Pellicle® Waves, Quartz fabric. Caper® chair shells in Graphite with Black armpads and Black FLEXNET™ seats.

Expanding enrichment

Encourage teamwork in back-to-back workstations.
Separate workspace from aisles with poles and boundary screens.
Offer enclosure with varying pole and screen heights.
Provide convenient and secure storage with storage cabinets, ladder shelves, and pedestals.

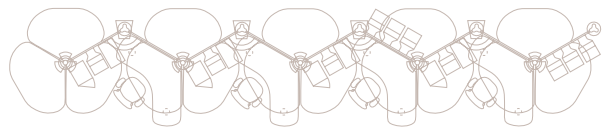

Boundary and display screens shown in Tea Leaf Grey. Infrastructure in Metallic Silver with Cool Grey Neutral trim. Coordinating accessories in Cool Grey Neutral. Work surfaces and shelves in Soft White laminate with Metallic Silver supports, Cool Grey Neutral trim. Storage in Metallic Silver with Cool Grey Neutral trim. Mirra® chair bases and armpads finished in Shadow, and chair backs and AireWeave™ seats in Alpine.

Human connection

Enable shared work in two-sided workstations with outbound work surfaces.
Create enclosure with canopies and tall poles.
Provide space for materials in traditional pedestal storage, ladder shelving, and storage cabinets.
Present a professional, unified appearance with light, clean colors, materials, and finishes.

Boundary screens shown in Spa Blue. Work surfaces in Light Anigre Formcoat Fleck finish. Storage in Metallic Silver with Folkstone Grey trim. Mirra chair backs in Alpine, armpads and bases in Shadow, and AireWeave seats in Alpine.

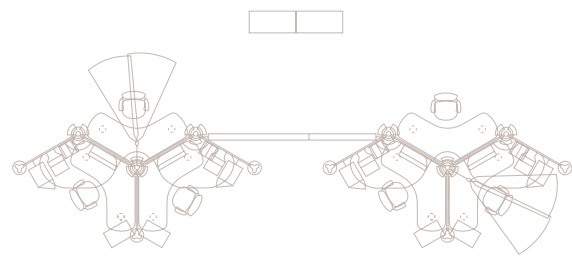

Light and open

Balance openness and enclosure in a cluster of three-sided workstations.
Accommodate individual privacy with rolling screens.
Establish power and data pathways, as well as wayfinding, with poles and trusses.
Offer suitable active and archival storage choices with traditional pedestal and lateral files.

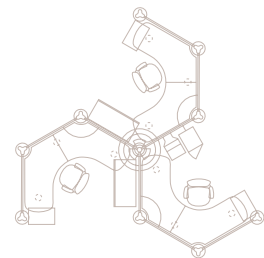

Display screens shown in Paprika Orange. Boundary screens in Dusty Bronze. Canopies and rolling screens in Seashell White. Work surfaces and shelves in Sandstone laminate. Resolve storage cabinets and Quadrant pedestal files in Metallic Bronze finish with Warm Grey Neutral pulls. Quadrant lateral files in Soft White. Aeron chair frames in Smoke, Titanium bases, and Pellicle Waves in Mineralite.

Inviting, engaging

Create a warm and inviting atmosphere with upscale veneer surfaces.
Accommodate heads-down, focused work in a four-sided workstation to suit managerial needs.
Enhance privacy with acoustical inserts.
Divide space with varied infrastructure heights.

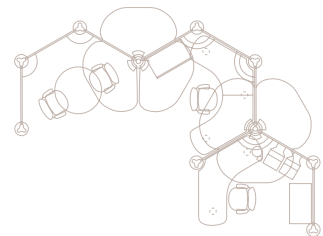

Boundary and display screens in Summer White and Customer's Own Image (COI). Canopies in Seashell White. Infrastructure in Metallic Champagne with Sandstone trim. Work surfaces and shelves in Natural Maple Veneer. Storage in Metallic Champagne finish with Sandstone trim. Lateral file shared tops in Natural Maple Veneer. Mirra chair bases in Shadow, with backs and armpads in Alpine, and AireWeave seats in Alpine.

Professional and versatile

Balance connection and boundaries in an upscale central workstation for the executive.
Create adjacency to meeting space as well as administrative support.
Define identity, signify wayfinding, and complement fabric screens with customized canopies.

Boundary screens in Horizon Beechnut fabric, canopies in Seashell White, embroidered in a COI pattern. Infrastructure in Metallic Bronze finish and Brownstone trim. Executive workstation surfaces and Eames meeting table in Aged Cherry Veneer. Administration workstation surfaces in Aged Cherry Formcoat Fleck finish. Quadrant lateral files in Metallic Bronze with Brownstone trim. Aeron chair frames with Graphite finish, Polished Aluminum bases, Black Leather armpads, and Pellicle Waves in Hematite.

Ayse Birsal – Designer of Resolve

Resolve designer Ayse Birsal is principal of Birsal + Seck. She was born in Turkey, a land of contrasts. Birsal and her designs are combinations of contrasting points of view. Like her homeland, where thoroughly modern ideas and practices exist side by side with centuries-old structures and customs, Birsal's designs make everything work. She adopted a “no-nonsense” view of design—as Ayse says, a way of “distilling problems, solutions, and forms to their essence.” This became her design perspective—distilling problems to reveal novel answers.

Birsal has won numerous design awards, and her work is part of the permanent collection of the Museum of Modern Art.

Environmental statement:

Resolve uses much less material than a traditional office system, which significantly reduces its environmental impact. Workstations, which are 86% recyclable and contain 27% recycled materials, are also about one-third the weight and volume of most systems. And every part can be easily disassembled for recycling.

Warranty statement:

Resolve is durable for a long life and carries a comprehensive 12-year, 3-shift warranty.
